Software Development Life Cycle

## WORK EXPERIENCE

Digital marketer 2024 - Present

### ICT Foundation, Sri Lanka

Managing digital marketing activities, including content creation and social media strategies, to enhance online presence and engagement, with a focus on optimizing campaign performance.

Software Engineer 2024 - Present

### Lanka Design, Sri Lanka

Software Engineer at Lanka Design, crafting innovative web and mobile solutions with a focus on performance, user experience, and modern development practices.

Assistant Secretary 2024 - 2025

### Student Council - ESOF Metro Campus, Jaffna

Supporting council operations, organizing student events, and assisting in administrative tasks to promote student welfare and engagement within the campus community.

Digital marketer 2024 - 2025

### Pathfinder Club - ESOF Metro Campus, Jaffna

Leading digital marketing efforts, managing online content, and executing social media campaigns to boost brand visibility and engagement, while ensuring alignment with business goals.

UI/UX Freelancer 2019 - Present

### Self-employed

Designing user-friendly interfaces and prototypes using Figma and Adobe XD. Collaborating with clients to create intuitive web and mobile app designs.

## PROJECTS

Malcolm Lismore 2024

### Project Details

Developed a professional photography portfolio website featuring a categorized gallery, booking system, and admin dashboard to streamline operations and enhance client engagement. Improved user experience and business efficiency, enabling the client to focus on capturing high-quality visual content.

## EVC OTT

2024

### Project Details

Designed the UI/UX for E-Video Cloud (EVC), a Sri Lankan cloud-based streaming platform, using Figma to create an intuitive and engaging user experience. Key features include EPN for creators, eVideo Discovery, personalized My Library, eM Player, gifting system, and customizable settings.

### Technologies been used

- Figma
- Photoshop
- Illustrator

## Bus Reservation System

2024

### Project Details

Developed a Java-based Bus Seat Reservation System enabling customer and bus operator registrations, real-time seat booking, cancellations, and queue management. Features include dynamic data handling, confirmation notifications, and a user-friendly interface for efficient travel management.

### Technologies been used

- Java
- VS Code
- Mongo DB

## Sampath Food City Price and Sales Analysis System

2025

### Project Details

Developed a Python-based command-line data processing system for Sampath Food City to analyze sales, product trends, and pricing using Pandas and design patterns. Built with SOLID principles for scalability and maintainability, enabling efficient, data-driven decision-making without a frontend interface.

### Technologies been used

- Python
- Pycharm
- Mongo DB
